- Master's degree, Master of IT management

September 2016 - July 2020  
National University of Science and Technology "MISIS"

- Bachelor's degree, Business Informatics

## LANGUAGES

- Russian (Fluent)
- English (Fluent)
- German (Basics)

## PROFILE

I graduated from one of the leading technological universities in the Russian Federation with a bachelor's degree in IT and business analysis. I completed an internship at a major ERP systems vendor. I then spent four years at PwC as a consultant in the Technology Department, participating in major projects related to the implementation, optimization, and enhancement of ERP, Accounting, HR, and CRM systems for clients. During this period, I worked with large oil and gas, retail, and metallurgical companies.

I also have strong skills and extensive experience in working with artificial intelligence systems.

## WORK EXPERIENCE

### PwC Moscow, Russia

August 2019 - May 2023

Business Consultant

- Technology Department Consultant. Worked with clients' IT infrastructure, focusing on professional consulting services for companies in the oil and gas and metallurgical sectors.

#### Responsible for:

- Client business process analysis
- Design of As-Is and To-Be diagrams
- Preparation of improvement recommendations
- Development of business process efficiency indicators
- Comparative analysis of business processes
- Data model design
- Dashboard development
- Drafting of commercial offers
- Preparation of project reports

#### Project examples:

- Development of ESG reporting dashboards for a large steel company
- ERP indicator development
- Service center comparative analysis for a large oil and gas company
- Comparative analysis of financial reporting effectiveness, followed by an assessment of key areas, for a large-steel company
- Development of predictive models for forecasting P&L (IFRS) items for a large oil and gas company
- Description and optimization of current business processes, as well as the design of required business processes, for a large oil and gas company

### 1C Rarus Moscow, Russia

May 2019 - July 2019

Junior Developer in a Large ERP system vendor

- Participated in an ERP system implementation for a large company

#### Responsible for:

- ERP system testing ("1C Holding Management")
- Setting up integration between accounting and ERP systems
